

THE CORES

THE CARDBOARD CORE AS A TUBE WINDING SUPPORT

STRONG, ENVIRONMENTAL AND AFFORDABLE

FROM 7 TO 650 MM OF INTERIOR DIAMETER
TO 18 MM OF THICKNESS
FROM 5 MM TO 12 M OF LENGTH

○ Cardboard core

The cardboard core is ideal and economic to roll the products of numerous industrial sectors.

○ Expertise

Our expertise allows to optimize the cores performance level by using the more tubular processes and raw materials.

○ Equipment

Our production sites are equipped of manufacturing tools and control in order to ensure a high-quality of your products :

- winding machines,
- right coiling machines,
- recutters machines,
- crimpers,
- sertisseuses,
- laboratories equipped of radials tests, flat
- crush etc...

APPLICATIONS

- winding for plastic film, paper, textile, adhesive tape, carpet, label, tissue, etc...

Cardboard contributes to the **protection of the environment** and supports the **sustainable economy**.

THE CORES

IDEAL COILING SUPPORT TO SPOOL OR UNWIDE

○ Applications

To fit all your needs

- graphic paper for fast speed printing,
- wrapping paper,
- gift paper, thin paper, kraft or testliner,
- dielectric paper, cigarette, filter paper,
- corrugated paper,
- papemaker cardboard,
- technical paper,
- textile (crimped cores with crepe coating)
- cotton (tearable cores),
- nonwoven,
- plastic film,
- stretch film,
- metallic film.

○ Possibility of specifics coatings:

- nonslip,
- P.E.,
- silicone,
- cellophane,
- waterproof,
- M1 for buildings and public places.

○ Customization :

- exterior, interior printing,
- edge printing,
- notch,
- slitting,
- gluing, for unwinding up to the last cm,
- drilling,
- collage,
- threading,
- knurling,
- embossing,
- etc.

Cardboard contributes to the **protection of the environment** and supports the **sustainable economy**.
